Just how powerful is our mind? How God designed us to be co-creators.

Mentally have the idea

Expectancy determines outcome

As long as you are not attached to the outcome the outcome will become guaranteed

Every cell in your body is reacting to your internal dialog

By Changing your internal dialog you can influence the chemistry of every cell

BUT HOW???

Just how powerful is our mind? How God designed us to be co-creators.

The double-slit experiment has become a classic for its clarity in expressing the central puzzles of quantum mechanics. Because it demonstrates the fundamental limitation of the ability of **the observer to predict experimental results**, [Richard Feynman](#) called it "a phenomenon which is impossible [...] to explain in any [classical way](#), and which has in it the heart of quantum mechanics.

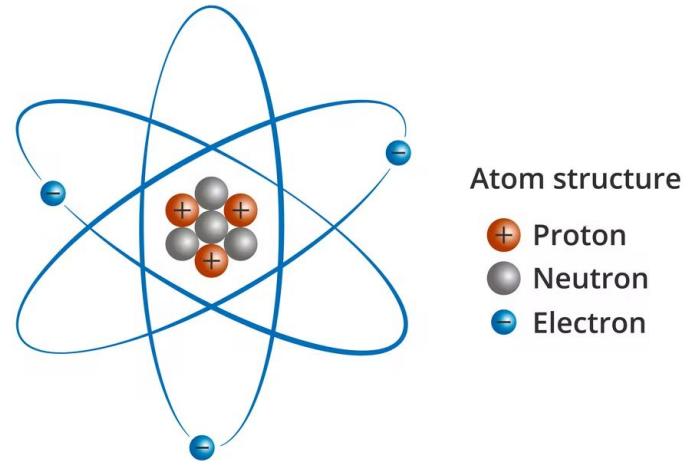

An electron is a **negatively charged subatomic particle that can be either bound to an atom or free (not bound)**. An electron that is bound to an atom is one of the three primary types of particles within the atom – the other two are protons and neutrons. Together, electrons, protons and neutrons form an atom's nucleus.

Are humans made of electrons?

At a pretty basic level, **we're all made of atoms, which are made of electrons, protons, and neutrons.**

How many electrons are in the human body?

The total number of electrons in the human body is typically in the order of **10^{28}** . That's 10 with 28 zeros

Just how powerful is our mind? How God designed us to be co-creators.

What happens when you observe an electron?

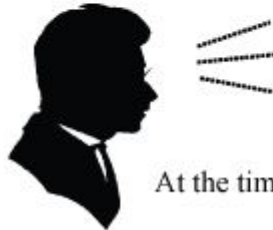

When under observation, **electrons are being "forced" to behave like particles and not like waves**. Thus the mere act of observation affects the experimental findings.

Wave Form = Unlimited potential

Before Observation - Wave - spread out over space and time

Particle Form = Changes to what you expect to see

At the time of observation - Particle- localised space time event

What are some examples of looking at something and seeing what you want to see? Remember, what you see is what you expected to see. This could be considered positive or negative.

- Expecting of having enough gas to make it to the gas station
- Thinking of buying a certain car
- Entanglement - like twins - seeing and feeling the same thing at same time
- Opened yourself up for new experiences which then ended up being everywhere
- I hope I don't get sick, I would hate to miss work, I don't have sick time and I need the money.
